- Solution Dyed Nylon is non-allergenic
- Will not shed or pill
- Easy to maintain
- Luxurious feel underfoot
- New Zealand after sales service
- Tufted and stocked in New Zealand**

About Feltex Carpets ColourStrength™ Solution Dyed Nylon

The pile content of **Fair Oaks** and **Western Hills** is made from 100% Solution Dyed Nylon fibres. These fibres provide the ultimate in carpet colourfastness, stain protection and performance. That's why Feltex Carpets can confidently offer New Zealand families with such an extensive warranty package!

The manufacturing process

The polymers that make up **Western Hills** and **Fair Oaks** Solution Dyed fibres are fully stabilised and treated with UV protecting additives. These same polymers are coloured using only the very best quality colour pigments available. This means the colour is locked into the molecular structure of the yarn prior to the carpet itself being manufactured.

These Solution Dyed fibres are processed into high quality yarns suitable for tufting into carpet. These premium yarns are designed to retain their colour and handle busy family environments.

The yarn is then tufted into carpet at our manufacturing plant which is located in Auckland, New Zealand.

- Excellent tip definition provides a tailored finish

*For full details in regard to the installation, care and characteristics of Feltex Carpets, as well as the terms and conditions of the Feltex Warranties provided in this brochure, please refer to the Feltex Carpets "Warranty and Maintenance Guide" or visit www.feltexcarpets.co.nz or phone 0800 100 008.

**Specifications are subject to manufacturing variances. Material supply and/or manufacturing process may necessitate specification changes without notice.
